

申江凯斯博格流体科技(青岛)有限公司  
Apureda Cosbog Fluid Technology (Qingdao) Co., LTD

# 凯斯博格， 努力做的更好！

Cosbog-Compressed air  
system, better of globe.

## 公司简介 Company Profile

申江凯斯博格流体科技(青岛)有限公司,成立于2005年,坐落于大连,专注于生产铝合金管道及管件。产品广泛应用于压缩空气和惰性气体的传输领域,并在业界树立了良好的声誉。为了满足业务发展的需求,2015年在青岛建立了新的生产基地,致力于为客户提供性价比更高的产品。

凯斯博格的产品因其节能特性、管件抗锈性、螺母嵌入式设计以及独特结构和高品质外观而备受客户青睐。企业不断追求产品质量与附加值的提升,旨在向客户提供卓越的产品和服务。

Apureda Cosbog Fluid Technology (Qingdao) Co., LTD.(Cosbog for short) was established in Dalian in 2005 specializing in the production of aluminum alloy pipes and fittings. The products are mainly used for the transmission of compressed air and inert gases. Cosbog has got high reputation in this field.

Cosbog built new production base in Qingdao in 2015 due to business development in order to provide more cost-effective products. Cosbog's products are favored by consumers due to energy-saving, rust resistant fittings, embedded nut structure, unique process and premium appearance. Our goal is continuously to improve product quality and added value with better products & services.

# CosBog® 为什么选择凯斯博格？

## Selling point

1

口径大，流量高，  
压差小，节能

Large bore, higher flow  
rate, low pressure drop,  
energy conservation.

2

锌镍合金螺栓、螺母，  
不易生锈和损伤

Zinc-nickel alloy bolt  
and nut, not prone to  
be rusty and damage.

3

产品配有橡胶连接片，  
防止跌落

All union coupling with  
rubber connector  
prevent falling off.

4

所有管件螺母为嵌入式结构，  
无须现场组装，在任何时间  
都不会出现螺母脱落的情况。

All fittings' nuts are embedded,  
do not need install them at  
site. It will not fall off nuts  
at any time.

5

公司拥有先进的压铸机，  
全部管件均自主生产，  
便于质量管制，经久耐用。

We own advanced die-casting  
machine, all pipe fittings  
are produced by ourself.  
It is easy to control the  
quality and process.

6

严格把控外观品质，  
保证在同行业内脱颖而出。

Strictly control the painting  
to insure all our fittings  
surface are better than  
our competitors.

# 资质荣誉

## QUALIFICATIONS AND HONORS

CosBoq®自成立以来，通过对铝合金管路的深刻理解和潜心研究，自主研发铝合金节能管路系统，已获国家发明专利多项，实用新型专利多项。

CosBoq has gained a deep understanding and dedicated research on aluminum alloy pipes and has independently developed aluminum alloy energy-saving piping systems which have obtained multiple national invention and utility model patents since its establishment.

# ENERGY CONSERVATION

## 铝合金管路系统与碳钢管路系统的节能对比

Energy-saving comparison between aluminum alloy and carbon steel piping system.

### 1 生命周期 LIFE CYCLE

就建筑生命周期来讲，铝合金系统能节省下2~3个碳钢管管网系统的材料与施工成本，还包括装修成本，而且还节省了设备搬运费、设备折旧损耗费、设备维护费等。

In terms of the building life cycle, aluminum alloy systems can save materials and construction costs for 2-3 carbon steel pipe network systems, including decoration, equipment handling and depreciation as well as maintenance costs.

### 4 节约费用 SAVE COSTS

就碳钢管系统生命周期(5年-10年)来计算，与铝合金系统整体比较，运行费用这一部分，铝合金系统比碳钢管系统节能至少10%以上。

Based on the life cycle of carbon steel pipe systems (5-10 years), comparing with aluminum alloy systems as a whole, aluminum alloy systems can save at least 10% more energy in terms of operation costs compared to carbon steel pipe systems.

### 2 维护成本 MAINTENANCE COSTS

碳钢管在一个生命周期中,维护成本逐年上升,铝合金系统因没有锈蚀问题,在其整个生命周期中运行费用都比较稳定。

The maintenance cost of carbon steel pipes increases year by year throughout their life cycle, while the operation costs of aluminum alloy systems remain relatively stable during their entire life cycle due to the absence of corrosion issues.

### 5 系统压力损失 SYSTEM PRESSURE LOSS

更大的内径，在同等流量下，流体的沿程摩擦阻力更低，压力损失比其他厂家最多低45~50%。

With a larger inner diameter, at the same flow rate, the frictional resistance of the fluid along the way is lower and the pressure loss is at most 45-50% lower than other manufacturers.

### 3 便捷安装 ASSEMBLY

安装洁净，装拆方便，安全可靠，无需焊接施工，安装简便，管件可多次拆卸安装，经久耐用，缩短工期，提高工效。

Clean installation, convenient disassembly, safe and reliable, no need for welding construction, easy installation, pipe fittings can be disassembled and installed multiple times, durable, shorten construction period and improve work efficiency.

### 6 绿色环保 GREEN MATERIAL

铝合金生命周期后，可100%回收利用，评估残值可达到60%以上，而碳钢管仅为5%。

Aluminum alloy can be 100% recycled at the end of its life cycle with an estimated residual value exceeding 60% while carbon pipes only account for 5%.

# CosBog® 铝合金管路的优势

## ALUMINUM PIPE ADVANTAGES

### 1. 铝合金管路不锈蚀

Non rusting

### 2. 重量是钢材的三分之一，便于安装，节省人力成本

The weight is one-third of steel, easier installation and labor cost savings.

### 3. 减少结构整体负载，环保耐用

Reducing overall structural load, environmentally friendly and durable

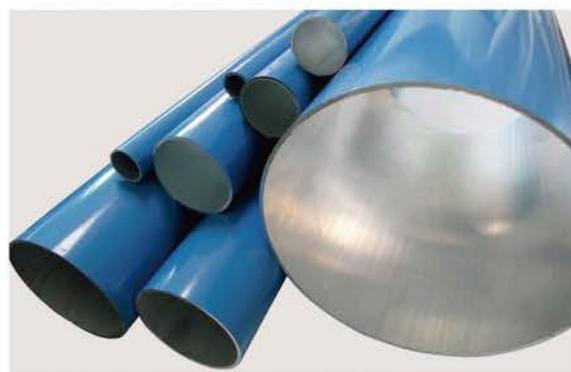

### 4. 现场无焊接，从而保证施工环境，有效缩短施工周期

No welding on site, ensuring operation environment and effectively shortening the construction period.

### 5. 更加节能内壁光滑，同等管径，阻力系数小，沿程摩擦阻力系数为镀锌钢管的1/10

More energy-efficient with smooth inner walls of the same diameter and low resistance coefficient. Its coefficient along the way is 1/10 of traditional galvanized steel pipes.

## 传统管路

Traditional piping

- 具有较高比摩阻，也就等于具有较高的初始压降。
- 腐蚀会增大摩擦系数，减少内径，压降增加，从而导致较高的能耗，至终端用气点压力不足而影响使用效果。
- 传统管网不稳定，随着时间推移，泄露问题很难解决。
- Having a higher specific friction is equivalent to being higher initial pressure drop.
- Corrosion increases friction coefficient, pressure drop and inner diameter reducing, which will affect effectiveness of use due to higher energy consumption and insufficient pressure at the end gas consumption point.
- Traditional pipes are not stable, leakage problems are difficult to solve with time pass.

## 铝合金节能管路

Aluminum alloy energy-saving piping

- 铝合金管光滑的内表面低阻力输送压降不受使用时间的影响
- 自压密封防泄漏
- 管件全通径设计降低压力降
- The delivery will not be affected by usage time due to smooth inner surface and low resistance of aluminum alloy pipes.
- Self pressure sealing and leak prevention.
- Full bore design of pipe fittings with low pressure drop.

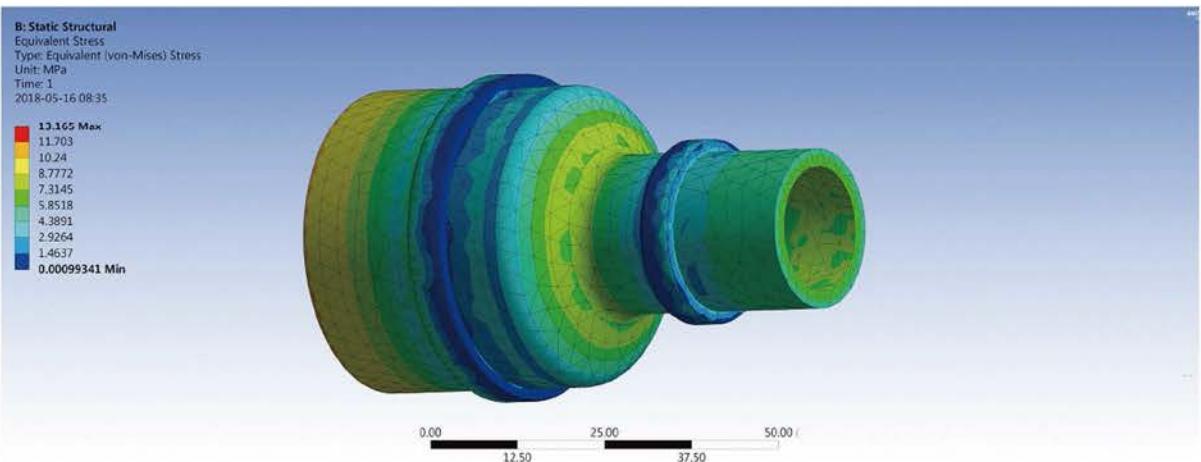

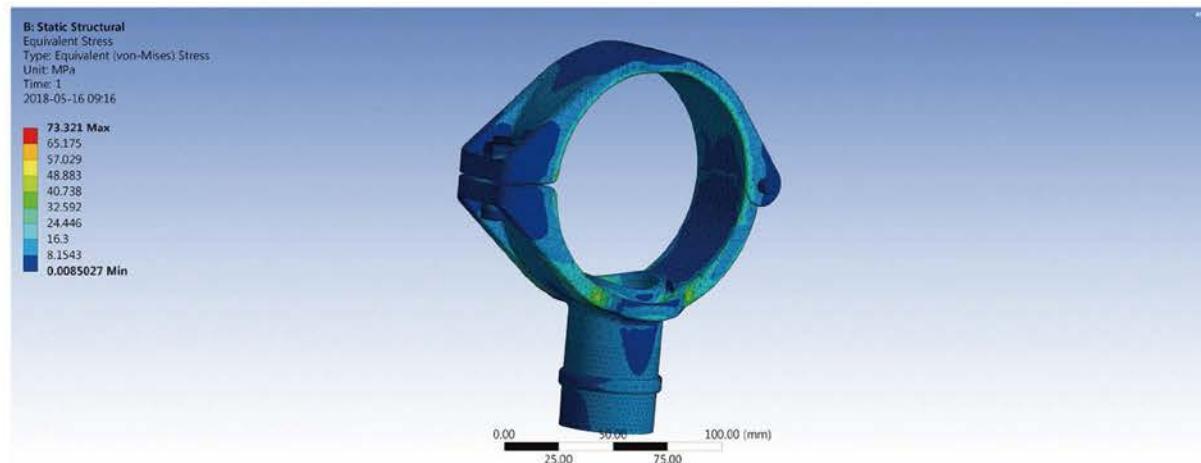

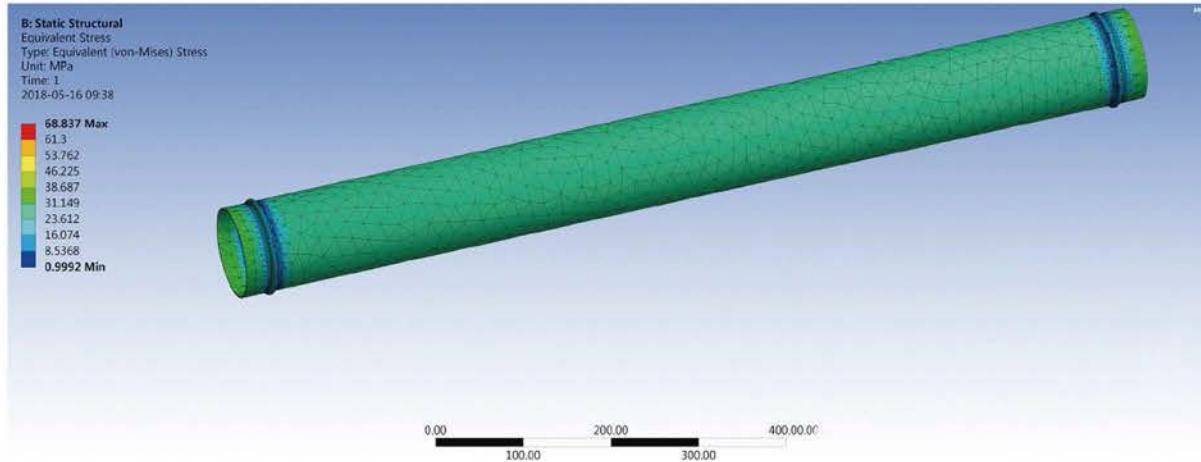

# CosBog® 管路数据分析

## PIPING DATA ANALYSIS

管路及管件都进行了有限元分析,产品性能有保证1.6MPa内压时,管件应力分析

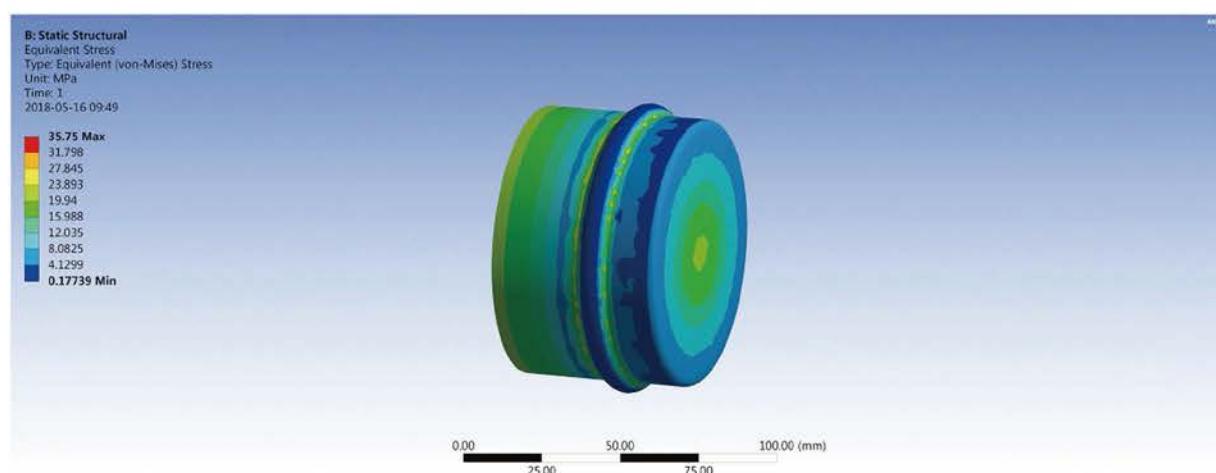

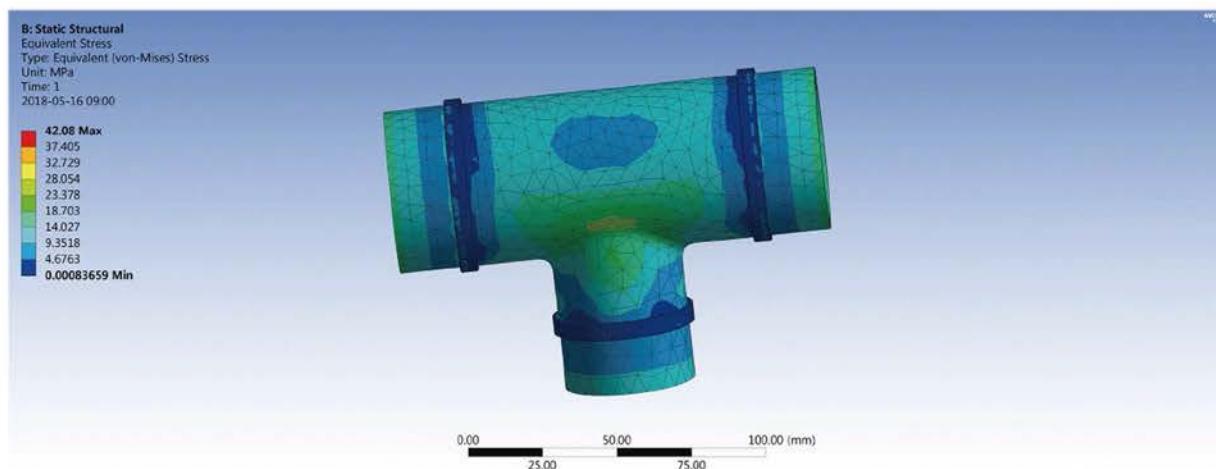

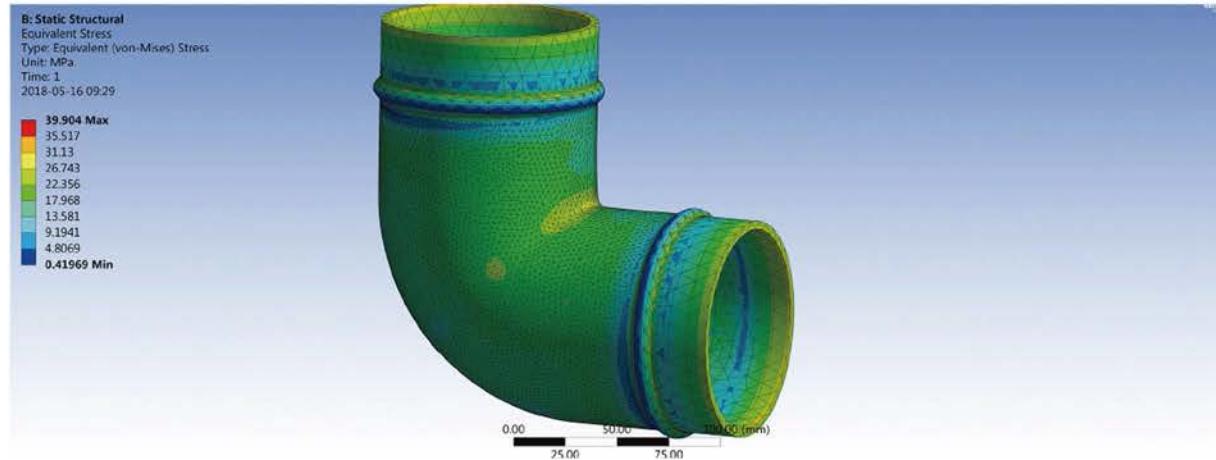

The products performance are guaranteed because piping and fittings were conducted by finite element analysis.

### 刚性铝合金管

### RIGID ALUMINUM PIPE

- 适合的流体:压缩空气、真空、氮气、惰性气体等
- 最高工作压力<1.5Mpa
- 工作温度范围:-20℃~+80°C
- 无缝挤压铝管(符合GB/T4437.1-2000标准)
- 灰色, 黄色须提前订制
- Max. working pressure <1.5Mpa
- Suitable for compressed air, vacuum, nitrogen and inert gases etc.
- Working temperature range: -20°C~+80°C
- Customized for gray and yellow pipes.
- Seamless extruded aluminum tube (Complies with GB/T4437.1-2000 standard)

Description 规格	O.D (mm) 外径(mm)	I.D (mm) 内径(mm)	Thickness (mm) 壁厚(mm)

### 铝合金卡箍（直接） STRAIGHT UNION COUPLING

- 由两片箍片组成，牢固锁紧连接件

- 承受更大的工作压力，不易泄露

- 可以连接直径更大的铝合金管

- 安装操作简单

- 消除管道的内力

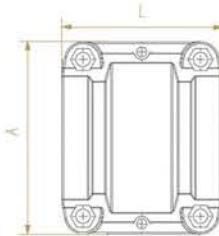

- Consisting of two clamshell clamps, firmly locking the connection point.

- Absorbing higher working pressure, less prone to leakage.

- Be able to connect aluminum alloy pipes with larger diameters.

- Easy and quick installation

- Eliminating internal forces in piping.

### 管夹

#### HANGER CLIP

- ◆ 垂直或水平安装
- ◆ 管路结构支撑，承受管道载荷
- ◆ 限制、控制和约束管道在任一方向的变形
- ◆ 管道振动的减震器
- ◆ Vertical or horizontal installation
- ◆ Piping structure support, withstand piping load
- ◆ Restrict, control and constrain the deformation of pipes in any direction
- ◆ Shock absorbers of piping vibration

Nominal dimension 规格 DN	A/Length 长度 (mm)	B/Length 长度 (mm)	L/Length 长度 (mm)
DN20	34	30	54.4
DN25	44	30	59
DN40	65	40	104.4
DN50	80	40	117.4
DN65	100	40	132.7
DN80	120	50	173
DN100	146	50	203

### U型管夹

#### U-SHAPED PIPE CLIP

- ◆ 执行国家标准为：

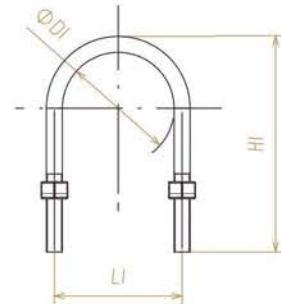

JB/ZQ4519-97(3)

组成：管夹体、螺母

- ◆ National standard:

JB/ZQ4519-97(3)

◆ Composition: Clip, nuts

Nominal dimension 规格 DN	A,D1 /Dimension 内径 (mm)	L1/Length 长度 (mm)	H1 /Length 长度 (mm)
DN20	23	40	73.5
DN25	29	48	81
DN40	43.6	62	100
DN50	54.4	76	118
DN65	69.6	94	135
DN80	85.8	106	152
DN100	105	136	190
DN125	130	164	217
DN150	158.5	192	247
DN200	218.5	248	311

### 金属软连接

#### METAL FLEXIBLE HOSE

- ◆ 金属软管是现代工业设备连接管路中的重要组成部件。

- ◆ 耐压金属软管的压力范围一般为PN0.6—16.0Mpa。

- ◆ 金属软管是软管安装在压力管路中的主要承压件，同时对波纹管起护套作用，根据管道中的压力大小，可选择一层编织。

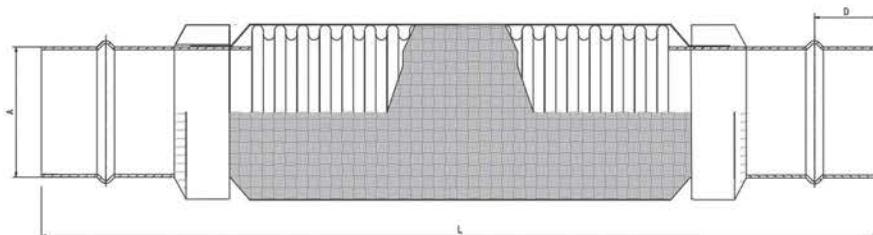

- ◆ 管路系统采用金属软管不仅可以提高系统疲劳破坏的能力，还可以达到降低噪音的效果。

- ◆ Metal flexible hoses are important components in modern industrial equipment connection.

- ◆ Pressure range is PN0.6-16.0Mpa.

- ◆ Metal flexible hoses are the main pressure bearing components in pressure piping and also serve as protective sleeves for corrugated pipes. Depending on the pressure in the pipeline, a layer of weaving can be selected.

- ◆ The use of metal hoses in piping systems can not only improve the system's fatigue damage but also achieve the effect of reducing noise.

Nominal dimension 规格 DN	L/Length 长度 (mm)	A/Length 长度 (mm)	D/Length 长度 (mm)
DN40	500	Φ 43.6	24
DN50	500	Φ 54.4	25
DN65	500	Φ 69.6	34
DN80	600	Φ 85.8	34
DN100	600	Φ 105	34
DN125	600	Φ 130	34
DN148	600	Φ 148	34
DN150	600	Φ 159	34
DN200	600	Φ 219	34
DN250	600	Φ 273	34

### 悬臂支架

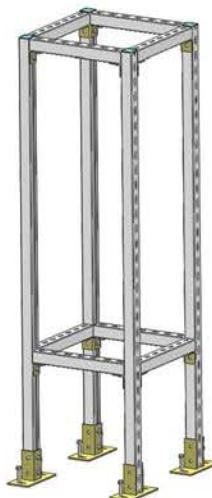

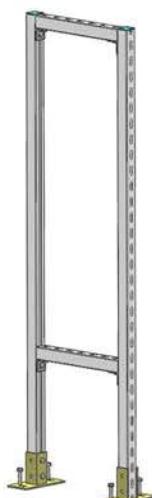

#### CANTILEVER BRACKET

### 支架

#### SUPPORT BRACKET

- ◆ 适用于机房管路、过滤器支撑
- ◆ 组成：C型钢、L型连接片、六角螺栓、蝶翼螺母、底座、内膨胀螺栓
- ◆ 采用C型钢组装形式
- ◆ 根据现场工况可调整安装尺寸，便于施工，可以满足95%的工况
- ◆ Suitable for machine room piping and filters support
- ◆ Composition: C-shaped steel holder, L-shaped connector fitting, hexagon socket bolts, butterfly wing nut, base and inner expansion bolt.
- ◆ Assembled by C-shaped steel.
- ◆ The installation size can be adjusted according to the on-site situation, which is convenient for construction and can meet 95% working conditions.

##### ◆ 轻型支架

适用于支撑DN50以下  
管道及过滤器

##### ◆ Light bracket

Suitable for supporting pipes  
and filters below DN50.  
Piping and filter

##### ◆ 重型支架

适用于支撑DN65以上  
管道及过滤器

##### ◆ Heavy duty bracket

Suitable for supporting pipes  
and filters above DN65.

##### ◆ 过滤器支架

适用于支撑重型过滤器

##### ◆ Filter holder

## INSTALLATION STANDARDS

### 管子切管

Pipes cutting

### 管内外必须倒角及去毛刺

Chamfer outer edges and deburr inner end.

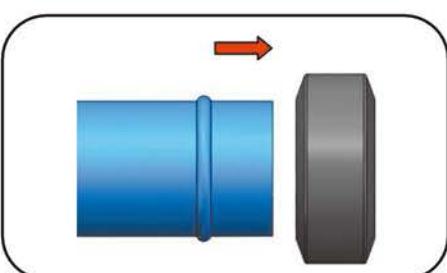

### DN20-DN200 管子与管件连接作业规范

Installation guide for DN20-DN200

1、将密封圈套入

管子端部

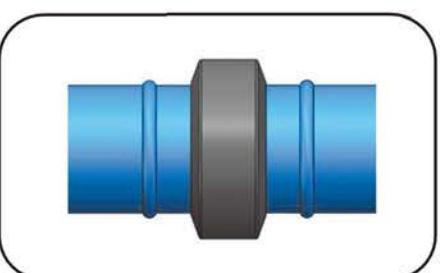

1.Slide the seal over the edge of the pipe and make sure flush with snapped ring.

2、将第二根管从另

外一侧插入密封圈

2.Insert the second pipe into the seal.

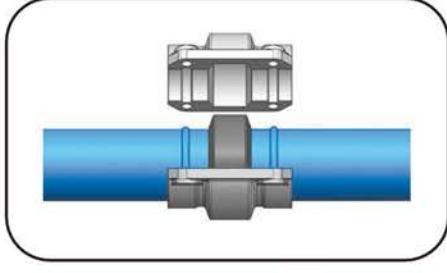

3、将管子凸槽与密

封圈调整到与管

件对应的装配处

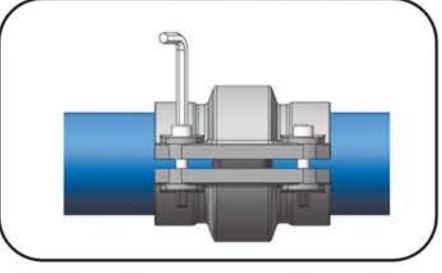

3.Position the coupling over the seal.

4、用内六角扳手拧

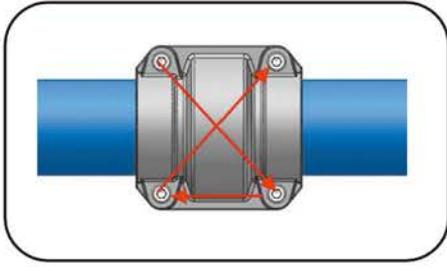

紧螺丝

4.Tighten the hexagon socket screw by hand firstly.

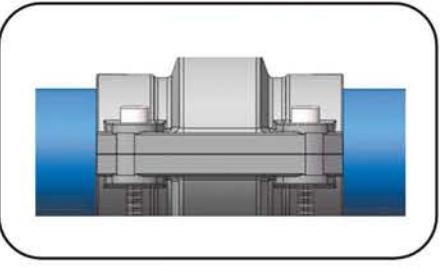

5、螺丝按图顺序依次锁紧，保证有效  
夹持密封，打开管件则以相反顺序松  
开螺丝

5.Tighten the screws in the order shown in the diagram, open the pipe fittings and loosen the screws in the opposite order.

6、用电动工具将螺丝  
锁紧，最小拧紧力  
矩：10 牛·米，使  
管件最终闭合

6.Use electric tools to tighten the screws, with a minimum tightening torque of 10 Nm to ensure that the pipe coupling is finally closed.

# CosBog® 安装准则

## INSTALLATION STANDARDS

### 下降管安装作业规范

Quick drop installation standards

CosBog®

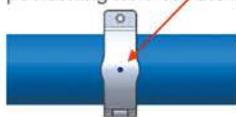

- 1、主管道水平确认（水平尺）  
1.Main piping check  
(levelling instrument)

- 2、将下降管按尺寸要求反向装配到主管道上  
2.Install the quick drop according the size  
with reverse direction.

- 3、用下降管的定位孔在主管道上用记号笔做好标记  
3.Mark the main pipe with a marker pen  
using the positioning hole of the quick drop.

- 4、取下下降管，在标记处用开孔器打孔，并用刮刀将毛刺去除  
4.Remove quick drop, drill hole at the  
marked area then removes burrs.

- 5、将密封圈放置下降管凹槽内，与开孔处贴合使下降管嵌入孔中，螺丝锁紧。（密封圈需平整）  
5.Place the seals in the groove of the quick drop and insert it in the hole, tighten the screw. (The seals need to be flat)

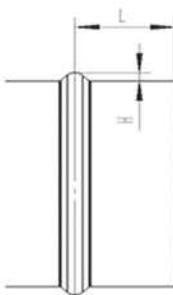

- 6、装入弯头，用气点管道，将固定螺丝锁紧  
6.Install the elbow and branch pipe, fully  
tighten the fixing screws.

# CosBog® 系统应用

## SYSTEM APPLICATIONS

Automobile and accessories, new energy, food industry, light industrial machinery manufacturing, electronic appliances.

随着工业的迅速发展，传统工业管道已经无法满足客户对压缩空气的更高要求，而铝合金管道跟随工业发展，能带客户解决后顾之忧。铝合金管道具有轻质高强、耐腐蚀性强、易于安装维护、节能环保等优势，在汽车及配件、新能源、轻工业、重工业、电子电器、机械制造、食品饮料、烟草制造、军工、医药医疗、航空航天等领域广泛应用。随着科技水平的发展和社会需求的不断变化，我们将不断的对产品升级和完善，以更好地满足各行业的需求。本着“以质求生，以诚为本”的原则，一路既往竭诚为客户提供更优质的产品，更完善的服务，为客户创造更多价值。

With the rapid development of industry, traditional industrial pipes are not able to meet the higher requirements of customers for compressed air, while aluminum alloy pipes can follow the development of industry and help customers solve their worries. Aluminum alloy pipes have advantages such as light weight, high strength, strong corrosion resistance, easy installation and maintenance, energy saving and environmental protection. They are widely used in fields such as automobiles and accessories, new energy, light industry, heavy industry, electronic appliances, mechanical manufacturing, food and beverage, tobacco manufacturing, military industry, medicine and medical, aerospace, etc. With the development of technology and the constant changes in social demands, we will continuously upgrade and improve our products to meet the needs of various industries. Adhering to the principle of "survival with quality and sincerity as the foundation", we will be dedicated to providing customers with higher quality products and more comprehensive services to create more value for our customers.

### 我们的经营理念

Business philosophy

专心 专注 专业  
与客户双赢  
Concentration and  
professional with  
win-win policy

### 我们的企业宗旨

Corporate mission

为客户创造价值  
为员工搭建平台  
Creating value for customers  
and building a platform  
for employees

### 我们的发展目标

Development goal

成为国内前沿  
节能管路集成商  
To be a leading energy-  
saving piping integrator
